P.T.O.

SECTION - C

Compulsory (15 Marks) :

(1×15=15)

12. You are the owner of a hardware store. The store has different kinds of items like paint, nuts, bolts, nails and such.

You have two kinds of customers; Regular customers and floating customers who walk in as they pass. Since it is becoming difficult to handle the store sales as well as to maintain the stock, you have decided to introduce computer based information systems in your store.

Envisage the requirements of the store and match accordingly the different information systems you would introduce by mentioning their applications.

12. Case Study (**Compulsory**) : (1×15=15)

Jumbo company is into FMCG sector and has branches in three states of South India. Their distribution network comprises of authorized branches – Franchises and Re-sellers. They have computerized with a centralized data management system. With competition growing by day, it is the experience of the customers with company's products and services that matters most and that determines the company's future. Gone are the days where one looks constantly for new customers ignoring the existing ones. It is imperative for the companies to keep the existing customers continuously engaged, serve to their satisfaction and generate more business through them and through their referrals.

Based on a survey they were able to get the below statistics that highlights the importance of positive customer experience and retention :

- Price is not the main reason for customer churn; it is actually due to the overall poor quality of customer service.
- A customer is 4 times more likely to defect to a competitor if the problem is service related than price or product related.
- The probability of selling to an existing customer is 60-70%. The probability of selling to a new prospect is 5-20%.
- For every customer complaint there are 26 other unhappy customers who have remained silent.
- A dissatisfied customer will tell between 9-15 people about their experience. Around 13% of dissatisfied customers tell more than 20 people.
- Happy customers who get their issue resolved tell about 4-6 people about their experience.
- It costs 5-6 times more to acquire a new customer than retain an existing one.

Questions :

- a) Suggest how implementing e-CRM can help in understanding the needs and expectations of customers.
- b) How can the distribution network yield business benefits through e-CRM ?
-
