A technical session on ‘Web Designing’ was organized on 07th October, 2017 for all the students of I Semester BCA and MCA. Mr. Sumit K Shankar was the Resource Person for the session. He has a Master’s Degree in Computer Applications and is currently working as a Senior Software Engineer in Brady PLC. He is also a Microsoft Certified Programmer in C#. He has more than seven years of experience in the field of Web Designing. He works for various projects on banking, energy, education and medical domains, paying attention on core areas like UI Design, Planning and Implementation, Database Design, Deployment and Bug fixing. He is also associated with several organizations such as Temenos India Pvt Ltd., i2i Telesolutions Pvt Ltd., Fidelity Investments, First America Corporation and many others. The speaker started the session with an introduction to websites. He then explained the differences between websites and web applications. He briefed the uses of technologies such as XHTML, CSS, and Java Script which are necessary for developing Web Applications. The required supporting technologies and tools in domain spaces for deployment of developed sites were also demonstrated. Students were curious to know about the server side support to facilitate the clients’ requests. All such queries were answered during the session.
Students’ queries clarified after the Lecture
