## Report on Invited Talk

**Date: 13-Aug-2019**

**Topic: Logical Thinking**

A technical session on **C / C++** was conducted on Tuesday, **the 13th Aug 2019** for all the Students of III semester BCA. **Mr. Ram Prasad was the resource person** for the session. Presently, he is running his own company by name "10seconds.com." Basically, he is a developer cum trainer. The objective of the session was to instill logical thinking so as to enhance their problem solving ability. To spark the minds of our Students he used C / C++ languages to build blocks of codes to accomplish tasks. Students were assigned few

problems to find out their cognitive level. Also, the trainer provided plenty of tips and tricks to crack interview sessions. Hopefully our Students will utilize the knowledge gained to shape their career.
