III Semester M.B.A. Degree Examination, February 2017  
(CBCS) 
MANAGEMENT 
Paper – 3.5.1 : Learning and Development 

Time : 3 Hours  
Max. Marks : 70  

SECTION – A  

Answer any five of the following questions. Each question carries 5 marks. \((5\times 5=25)\)  

1. Differentiate between training and learning.  
2. What are the challenges to become learning organisations?  
3. Explain the adult learning principles.  
4. Explain the measures of ROI on training.  
5. State the methods of career planning.  
6. Explain vestibule and sensitivity training methods.  
7. Explain the leader centred techniques of management development.  

SECTION – B  

Answer any three questions. Each question carries 10 marks. \((3\times 10=30)\)  

8. How do you determine the training needs of an industrial organisations? Explain.  
9. Describe John Keller’s ARCS model during the design of the training programme.  
10. Briefly enumerate any five methods available for measuring the outcome of training.  
11. Distinguish between employee training and management development. 

P.T.O.
12. Case Study:

Rajat Sharma has been employed for six months in the accounts section of a large manufacturing company in Faridabad. You have been his supervisor for the past three months. Recently you have been asked by the management to find out the contributions of each employee in the accounts section and monitor carefully whether they are meeting the standards set by you.

A few days back you have completed your formal investigation and with the exception of Rajat, all seem to be meeting the targets set by you. Along with numerous errors, Rajat’s work is characterised by low performance-often he does 20% less than the other clerks in the department.

As you look into Rajat’s performance review sheets again, you begin to wonder whether some sort of remedial training is needed for people like him.

Questions:

1) As a supervisor, can you find out poor performance of one employee is due to lack of training? Justify your answer.

2) How do you go about introducing a remedial training programme? Explain.

12. Case Study (Compulsory): (1x15=15)

The out-of-control Interview

Maria Fernandez is a bright, popular and well-informed mechanical engineer who graduated with an engineering degree from State University in June 2003. During the spring preceding her graduation, she went out on many job interviews, most of which she thought were conducted courteously and were reasonably useful in giving both her and the prospective employer a good impression of where each of them stood on matters of importance to both of them. It was, therefore, with great anticipation that she looked forward to an interview with the one firm in which she most wanted to work: Apex Environmental. She always had a strong interest in cleaning up the environment and firmly believed that the best use of her training and skills lay in working for a firm like Apex, where she thought she could have a successful career while making the world a better place.

The interview, however, was a disaster. Maria walked into a room in which five men-The President of the company, two Vice Presidents, the marketing director and another engineer-began throwing questions at her that she felt were aimed primarily at tripping her up rather than finding out what she could offer through her engineering skills. The questions ranged from unnecessarily discourteous (“Why would you take a job as a waitress in college if you’re such an intelligent person?”) to irrelevant and sexist (“Are you planning on settling down and starting a family anytime soon?”). Then after the interview, she met with two of the gentlemen individually (including the President), and the discussions focused almost exclusively on her technical expertise. She thought that these later discussions went fairly well. However, given the apparent aimlessness and even mean-spiritedness of the panel interview, she was astonished when several days later she got a job offer from the firm.

The offer forced her to consider several matters. From her point of view, the job itself was perfect-she liked what she would be doing, the industry and the firm’s location. And in fact, the President had been quite courteous in subsequent discussions, as had been the other members of the management team. She was left wondering whether the panel interview had been intentionally tense to see how she’d stand up under pressure, and, if so, why they would do such a thing.

Questions:

1) How would you explain the nature of the panel interview Maria had to endure? Specifically, do you think it reflected a well-thought-out interviewing strategy on the part of the firm or carelessness on the part of the firm’s management? If it was carelessness, what would you do to improve the interview process at Apex Environmental?

2) Would you take the job offer if you were Maria? If you’re not sure, is there any additional information that would help you make your decision, and if so, what is it?
